PERSONAL INFORMATION

Birth date: 18 Jan 1997

Nationality: Syria

Residence Country: Syria

PROFESSIONAL SUMMARY

Detail-oriented IT Engineer and Senior-focused Frontend Developer with a robust foundation in software engineering, user interface design, and architectural implementation. Highly skilled in leveraging React, JavaScript, and contemporary web technologies to architect scalable, interactive, and high-performance web applications. Expert at bridging the gap between complex backend requirements and pixel-perfect, fully responsive user interfaces optimized for cross-device compatibility.

Demonstrated expertise in seamless RESTful API integration, state management, and dynamic UI/UX design patterns. Proven track record of writing clean, highly maintainable, and refactored code that strictly adheres to clean code paradigms, rigorous testing standards, and industry best practices.

Driven by a commitment to product quality, component reusability, and front-end optimization techniques. Constantly exploring modern software methodologies and emerging trends to deliver cutting-edge solutions that elevate both operational performance and end-user satisfaction.
